Client

Municipal Government of Trujillo Alto

Cost

\$80,000.000.00

Project Name

Trujillo Alto Diabetes Medical Center and Hospital

Description

This project consists in three independent and eco-friendly structures with his own characteristics but united by architectural skin with unique contemporary style. The main structure features a modern and efficient hospital specializing in diabetes with others programs. The second and third structure contains complementary health services, emergency medicine area and a corporative & tourist medicine hotel. Each structure was designed to respond their business and marketing needs.
